EDUCATION

The Ohio State University *Expected Graduation, May 2029*
Bachelor of Science: Data Science | Minor in Mathematics
GPA: 3.8

SKILLS

Languages and Tools: Java, HTML/CSS, Python, SQL, R, Tableau, Power BI
Technical Skills: 3D Printing, CAD, Laser Cutting, Welding

EXPERIENCE

Enterprise for Research, Innovation and Knowledge **Columbus, Ohio**
Digital Accessibility Specialist *Nov 2025 - Present*

- Audit and remediate 500+ digital documents for WCAG/ADA compliance using 3+ accessibility tools, including Adobe Acrobat Pro, CommonLook, and Allyant, to identify and resolve accessibility barriers.
- Remediate PDFs and scanned documents using OCR, accessibility tagging, reading order, alternative text, headings, lists, tables, links, and form elements to improve document accessibility and usability.
- Maintain Excel and Google Sheets trackers to monitor remediation progress across multiple document collections, organizing findings and completion status to support accessibility compliance workflows.

Ohio Manufacturing Innovation Center **Hilliard, Ohio**
Engineering Intern *June 2025 - Aug 2025*

- Collaborated on 3+ engineering projects developing software and hardware solutions for the City of Hilliard and local businesses, including a smart parking system that used camera-based detection to monitor parking-space availability and guide drivers to open spaces.
- Used engineering software, laboratory equipment, and prototyping tools to test and refine hardware and software solutions, improving testing efficiency and accuracy by 20%.
- Completed 3+ technical workshops in areas including 3D printing, laser cutting, and welding, gaining hands-on experience with manufacturing processes and prototype development.

PROJECTS

Retail Sales & Customer Analysis
Tech: R, SQL, Data Cleaning, SQLite, ggplot2
Objective: Analyze retail sales and customer data to uncover purchasing trends and identify opportunities for business growth.

- Cleaned and transformed 50,000+ records using R, preparing customer, product, and sales data for analysis.
- Wrote 15+ SQL queries to aggregate sales across product categories, customers, regions, and time periods.
- Created 10+ visualizations and reports using R and ggplot2 to identify top-performing products, customer purchasing patterns, and seasonal sales trends.

Student Performance Analysis: Statistical & Data Analysis
Tech: Python, pandas, matplotlib, Jupyter
Objective: Analyze student performance data to identify relationships between academic outcomes, study habits, and student characteristics.

- Cleaned and analyzed 5,000+ student records using Python and pandas, preparing 15+ variables for statistical analysis.
- Conducted exploratory and statistical analysis across 10+ factors, examining relationships between study habits, attendance, demographics, and academic performance.
- Created 12+ visualizations using matplotlib to identify key trends and patterns in student performance and communicate data-driven findings.

INVOLVEMENT

Association for Computing Machinery – Women in Computing **Columbus, Ohio**
Outreach Coordinator *Aug 2025 - Present*

- Expand K-12 engagement in computing by coordinating hands-on coding and STEM events with schools, libraries, and community organizations, reaching 50+ students through 8+ outreach initiatives.
- Plan and execute Buck-i-Code, coordinating volunteers, activities, and event logistics to create an engaging introduction to computing for students.
- Build connections between students and the computing community through 10+ technical workshops and 6+ industry speaker events, providing opportunities to explore technical skills and career paths.
